In The Greene & Greene Style: Projects And Details For The Woodworker

Synopsis

Legendary architects and designers Charles and Henry Greene created a uniquely American style in the Arts & Crafts tradition, and this book combines a detailed understanding of their design aesthetic with specific shop instructions for re-creating their works. Filled with step-by-step instructions, extensive illustrations, and full-color photographs, the book features several full projects for making replica Greene & Greene furniture complete with authentic details such as ebony plugs and splines, waterfall legs, and curved drawer pulls. Showing today's woodworkers precisely how the Greenes achieved their unique designs, "'In the Style of Greene & Greene'" also includes valuable advice on incorporating Arts & Crafts elements into new designs.

Customer Reviews

If you are a woodworker even remotely interested in the Arts & Crafts movement (Stickley, Greene & Greene, etc.) then you know Darrell is at the top of this craft. As a professional woodworker, teacher and author he demonstrates extremely high quality designs and details that exemplify this style. I'm honestly blown away by the level of detail in this book. I bought it on pre-order without knowing what to expect. And while Darrell doesn't go into great detail on some of the more simple and common elements of G&G furniture (through tennon, cloud lift, etc), these are covered in other books (including his) and resources and you'll already have experience with them if you're tackling the details in this book. He does include a section on making square ebony plugs, though."In the Greene & Greene Style: Projects and Details for the Woodworker" goes further into the how-to of

some of Darrell's outstanding (and a couple unique/adapted) design elements by not only giving a description and photos , but actually dimensional drawings of the details, jigs to fabricate them, and step-by-step process of doing so. It's clear Darrell has learned from a lot of trial-and-error and is trying to get us up the learning curve faster so we can continue this beautiful style of furniture. Looking at photos of a finished piece, I wouldn't have expected this incredible detail was warranted but after reading it I think every one of the G&G details is presented with a necessary level of information to be duplicated by an interested woodworker.
