"The Realism Challenge" is a how-to art book on the hyperrealistic style of illustration. The author's step-by-step lessons use Bristol board paper, graphite pencils (usually just for the initial work), colored pencils (for color detail), and watercolor (for larger areas of color). He assumed that you're familiar with using graphite, colored pencils, and watercolor, but he also gave hints about how to get certain effects with them in case you're a beginner. You could probably get away with just colored pencils if you don't have or wish to use watercolor. This book was very good at teaching the reader the skills needed to make hyperrealistic illustrations. Once learned, those skills can be applied to hyperrealistic illustration of any subject. He broke each step down enough that I could both

understand and see what he was doing at that point in the illustration. I have currently completed some of the initial lessons/challenges, and my drawing has definitely improved. I'm not sure if I have enough patience and love of detail to do some of the later challenges, though. I think this book would be a great help to anyone just starting with hyperrealism--or with any drawing, for that matter, as it forces you to really see the object you're drawing. It's appropriate for teenagers and adults as long as you have the patience to put in the necessary detail. And we're talking a lot of hours (though not necessarily all at one time) for the later projects.
