ART Of The HEART And Other Anatomical Structures: A Human Anatomy Coloring Book

Synopsis

This coloring book was lovingly created for all those, young and old, who wish to see with more creative eyes the wonders of the human body. Young artists can learn about the parts of the human body as they play, anatomy students can make more meaningful connections with their subject matter as they interact with it in a new way, and older artists can refresh their memories, or perhaps learn something new as they enjoy the relaxation that a good coloring session can bring. Let both sides of your brain dance in harmony as you relax, unplug, awaken your creativity and learn! Perfect for all ages! Coloring is not just for kids! Learn about the anatomy of the cell, skull, brain, neuron, eye, inner ear, tooth, skin, heart, lungs, digestive system, kidney, bones of the hand, and bones of the foot.

Customer Reviews

I experienced fouseer invasive heart surgeries and a weekend cardiac intensive care in February so I needed to learn the language to communicate effectively with my doctors. I found the coloring book to be an effective tool for learning the names and anatomy of the heart. I recommend it.

My daughter is a Ph.D in tumor cell biology and is changingher concentration to Biomedical Illustrations. She said the book was very helpful. Thanks Mary Ellen Lukasiewicz

For my grandson who is entering college to become a nurse.

You'll love this coloring book!
